

Safety on snow

WINTER 2023-2024

Made in France

In a world where manufacturing gets more and more blurred, we don't know anymore where the products we're using daily are made and where they've been developed. We are proud that we have been developing and manufacturing our beacons in France. Achieving such a level of performance requires close collaboration between R&D, field testers, and production.

The proximity with our factories and ability to actively develop and work with technology make this possible. In addition to respecting the environment and working conditions, the essence is in the detail, and the quality of our safety products shows this.

Üretim giderek daha fazla bulanıklaştığı bir dünyada, günlük olarak kullandığımız ürünlerin nerede üretildiğini ve nerede geliştirildiğini artık bilmiyoruz. Ürünlerimizi Fransa'da geliştirip ürettiğimiz için gurur duyuyoruz. Böyle bir performans düzeyine ulaşmak, Ar-Ge, saha test uzmanları ve üretim arasında yakın işbirliği gerektirir.

Fabrikalarımıza olan yakınlığımız ve aktif olarak geliştirme ve teknoloji ile çalışma yeteneğimiz bunu mümkün kılıyor. Çevreye ve çalışma koşullarına saygı duymanın yanı sıra, işin özü ayrıntıda gizlidir ve güvenlik ürünlerimizin kalitesi bunu göstermektedir.

In einer Welt in der man den Überblick verliert, in der weder klar erkenntlich ist, wo die tagtäglich von uns verwendeten Produkte herkommen, noch wo diese entwickelt wurden, sind wir sehr stolz unsere LVS-Geräte in Frankreich zu entwickeln und herzustellen, in unmittelbarer Nähe zu uns und gleichzeitig unweit von Ihnen. Dies wäre nicht möglich, wenn wir uns nicht regelmäßig vor Ort begeben könnten, um die Entwicklung unserer Produkte verfolgen zu können. Wir könnten die ökologischen oder sozialen Vorteile einer Herstellung in Frankreich hervorheben, doch liegen unsere Gründe hierfür vielmehr in der Liebe zum Detail und dem Bestreben nach Qualität unserer ARVA Sicherheitsprodukte.

“35 yılı aşkın bir süredir ARVA, yüksek performanslı çığ kurtarma ekipmanı tasarlayıp üreterek insanları güvende tutmaktadır.”

Rescue people, protect the planet

Climate Neutral

For over 35 years, ARVA has kept people safe by designing and manufacturing high-performance avalanche rescue equipment. However, in the face of climate change, helping people also means protecting the natural spaces where they like to adventure.

Today, everyone has a role to play in limiting the current environmental imbalance. Greenhouse gas emissions are largely responsible for this imbalance, which is why ARVA launched a sustainability program in 2020 to establish a clear picture of the brand's environmental impact so that we can act effectively to protect the natural environment that fuels our passion for the outdoors. This carbon footprint assessment revealed that we emitted 1089 tons of CO2 in 2020 to run our business. The results allowed us to identify the parts of our business that emit the most greenhouse gases, and ARVA has set 14 objectives to reduce emissions.

Our overall objective is to reduce the brand's CO2 emissions by 15% by 2025. Starting in November 2021, every kilogram of CO2 equivalent emitted by ARVA will be offset by funding carbon sequestration projects through ClimatePartner.

35 yılı aşkın bir süredir ARVA, yüksek performanslı çığ kurtarma ekipmanı tasarlayıp üreterek insanları güvende tutmaktadır. Ancak iklim değişikliği karşısında insanlara yardım etmek aynı zamanda onların macera yaşamayı sevdikleri doğal alanları korumak anlamına da geliyor. Bugün, mevcut çevresel dengesizliği sınırlamak için herkesin oynayacağı bir rol var. Sera gazı emisyonları bu dengesizlikten büyük ölçüde sorumludur, bu nedenle ARVA, tutkumuzu besleyen doğal çevreyi korumak için etkili bir şekilde hareket edebilmemiz için markanın çevresel etkisinin net bir resmini oluşturmak amacıyla 2020'de bir sürdürülebilirlik programı başlattı. Dışarı. Bu karbon ayak izi değerlendirmesi, işimizi yürütmek için 2020'de 1089 ton CO2 saldıığımızı ortaya koydu. Sonuçlar, işimizin en çok sera gazı yayan kısımlarını belirlememizi sağladı ve ARVA, emisyonları azaltmak için 14 hedef belirledi.

Genel hedefimiz, markanın CO2 emisyonlarını 2025 yılına kadar %15 oranında azaltmaktır. Kasım 2021'den itibaren, ARVA'nın saldıği her kilogram CO2 eşdeğeri, ClimatePartner aracılığıyla karbon tutma projelerini finanse ederek dengelenecektir.

Seit mehr als 35 Jahren schützt ARVA Menschen mit der Herstellung der besten Ausrüstung für die Lawinenrettung. Menschen zu helfen bedeutet angesichts des Klimawandels auch, unsere Natur zu schützen. Heute muss jeder eine Rolle bei der Begrenzung von Ungleichgewichten spielen. Treibhausgasemissionen sind maßgeblich für die diese verantwortlich. Deshalb hat ARVA im Jahr 2020 ein nachhaltiges Entwicklungsprogramm ins Leben gerufen, das darauf abzielt, eine transparente Bestandsaufnahme des ökologischen Fußabdrucks der Marke zu erstellen. Diese Berechnung ermöglicht es, einen CO2-Fußabdruck der Markenaktivitäten von 1089 Tonnen CO2-Äquivalent im Jahr 2020 zu erstellen. Nach dieser Bewertung, die die Aktivitäten mit den meisten Treibhausgasen identifiziert, hat sich ARVA 14 Ziele zur Reduzierung der Treibhausgasemissionen gesetzt. Das Hauptziel ist es, die CO2-Emissionen bis 2025 um 15 % zu reduzieren. Ab November 2021 wird jedes von der Marke ARVA emittierte Kilogramm CO2-Äquivalent durch die Finanzierung von CO2-Sequestrierungsprojekten in Zusammenarbeit mit ClimatePartner ausgeglichen.

“ARVA tarafından
salınan her kilogram
CO2 eşdeğeri, karbon
finansmanı ile
dengelenecektir...”

Arva app

NEO BT PRO için yeni yerleşik yol arkadaşı

You can configure your NEO BT PRO directly from your smartphone. The configuration includes, for example, choosing the distance for the fine search and the standby mode time. Intuitive, quick and easy to use, setting up your device becomes child's play.

Le nouveau compagnon du NEO BT PRO. Configurez votre NEO BT PRO directement depuis votre smartphone, grâce à l'application ARVA. La configuration comprend par exemple le choix de la distance de recherche fine, ou encore le temps de mise en mode standby. Intuitif, rapide et simple d'utilisation, le paramétrage de votre appareil devient un jeu d'enfant.

Der neue Bordgefährte des NEO BT PRO. Konfigurieren Sie Ihren NEO BT PRO direkt von Ihrem Smartphone aus über die App. Die Konfiguration umfasst zum Beispiel die Auswahl der Feinsuche-Distanz oder der Dauer des Standby-Modus. Intuitiv, schnell und einfach zu bedienen - so wird das Einrichten Ihres Geräts zum Kinderspiel.

A complete app for all your mountain adventures

The application is not only for NEO BT PRO owners ! You can indeed find and consult your favorite Avalanche Risk Assessment Bulletins in a few seconds, you will also find a checklist of essential gear for practice.

Une application complète pour toutes vos sorties en montagne. Elle ne s'adresse pas seulement aux propriétaires d'un NEO BT PRO ! Vous pouvez en effet retrouver et consulter vos Bulletins d'estimation du Risque Avalanche préférés en quelques secondes seulement, vous retrouverez aussi une check list de matériels indispensables à la pratique.

Eine vollständige App für alle Ihre Ausflüge in die Berge. Sie ist nicht nur für Besitzer eines NEO BT PRO gedacht! Sie können Ihre bevorzugten Bergwetterberichte in Sekundenschnelle finden und abrufen sowie eine Checkliste mit den wichtigsten Ausrüstungsgegenständen finden.

A simple and playful way to practice

The NEO BT PRO features Bluetooth technology which not only makes it configurable: training sessions on searching for buried victims are also available. Find our Snow Safety Program to consolidate your theoretical skills.

Un entraînement simple et ludique. La technologie Bluetooth de notre NEO BT PRO ne permet pas seulement de le configurer : des entraînements à la recherche de victime d'avalanche sont également au programme. Retrouvez aussi notre Snow Safety Program afin de consolider vos compétences théoriques.

Ein unkompliziertes und spielerisches Training. Die Bluetooth-Technologie unseres NEO BT PRO ermöglicht nicht nur das Konfigurieren: Auch Trainingseinheiten auf der Suche nach Lawinopfern stehen auf dem Programm. Finden Sie auch unser Snow Safety Program, um Ihre theoretischen Fähigkeiten zu festigen.

Neo BT Pro

Bluetooth technology for connectivity with the ARVA app

REF: ARNINEOBTPROV1

Holster included
REF: ARZHOLNEOBTPROV1

ARVA's top-of-the-line avalanche transceiver, the NEO BT PRO combines performance and connectivity. With a search strip width of 80 m and Bluetooth technology, it will appeal to both professionals and the new generation of backcountry enthusiasts. Users can connect their NEO BT PRO to the ARVA app to access a wide range of services, including setting up their transceiver, planning an outing, or even practicing rescues. Experts will appreciate the enhanced analog mode with automatic calibration and a maximum range of 90 meters. For multiple burial situations, the SCROLLING mode offers rescuers maximum efficiency during the search phase. The NEO BT PRO is equipped with a soft holster to fit a wide range of body types.

Détecteur de Victimes d'Avalanche haut de gamme de la marque ARVA, le NEO BT PRO conjugue performance et connectivité. Doté d'une largeur de bande de 80 m et de la technologie Bluetooth, il saura satisfaire autant les professionnels que la nouvelle génération de pratiquants. L'utilisateur pourra connecter son NEO BT PRO à l'application ARVA pour accéder à un univers de services, tels que paramétrer son DVA, préparer sa sortie ou encore s'entraîner au secours. Les experts pourront bénéficier d'un mode analogique évolué offrant la gestion automatique des calibres et une portée maximum de détection de 90 m. En situation multi-victimes, le mode SCROLLING sera l'allié indispensable du secouriste pour optimiser le processus de recherche. Le NEO BT PRO est équipé d'un holster souple pour une adaptabilité optimale à un large éventail de morphologies.

Das High-End LVS von ARVA. Das NEO BT PRO vereint Leistung und Konnektivität. Mit einer Bandbreite von 80 m und Bluetooth-Technologie wird es sowohl Profis als auch die neue Generation begeistern. Das NEO BT PRO kann mit der ARVA-App verbunden werden, um das Gerät einzustellen und auf eine Vielzahl von Diensten zuzugreifen. So kann man etwa seine Tour vorbereiten oder Notfallsituationen üben. Experten können von einem fortschrittlichen Analogmodus mit automatischem Kalibrieren und einer maximalen Erfassungsbereichweite von 90 m profitieren. In einer Situation mit mehreren Opfern ist der SCROLLING-Modus der wichtigste Verbündete des Retters. Das NEO BT PRO ist mit einem flexiblen Holster zur optimalen Anpassung an unterschiedliche Körpertypen ausgestattet.

FEATURES

80 m search strip width

Bluetooth technology for connectivity with the ARVA app

Analog mode with automatic calibration

The scrolling function lets you choose which victim to search for

Group check mode including transmit frequency check

Marking function to identify victims already located; 4-victim display shows ""+"" beyond 4 victims

3 antennas to improve chances of finding a signal and for greater precision during the fine search

Digital signal processing efficiently guides the rescuer to the burial area

Autotest mode lets the device to diagnose whether its main functions are operating correctly

Backlit screen provides excellent contrast in all light conditions

Automatic revert-to-transmit mode detects of movement in the event of a secondary avalanche

Dynamic interference management lets users adapt their search technique in an area with a lot of signal interference

U-turn alarm lets the rescuer know they are heading in the wrong direction

Standby mode lets the user keep their device switched on while shoveling

Battery life in transmit mode: 350 hrs with alkaline batteries/450 hrs with lithium batteries

Weight: 214 g
(batteries included)

Bluetooth technology for connectivity with the ARVA app.

Analog mode with automatic calibration management

A device in standby mode is neither searching nor transmitting. This function allows the user to work the avalanche without their device interfering with the ongoing search. In the event of a secondary avalanche, the revert to transmit function automatically switches the device back to transmit mode.

80 m search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This feature is often used to compare beacon performance.

Evo 5

Minimum size, maximum performance

REF: ARNIEV05V2

NEW software

FASTER, MORE STABLE.

After 3 years on the market, the EVO5 will now benefit of the research and development made for the NEO BT PRO. More efficient in multi victim burial situations, it will get faster to the victims with an higher stability making it comfortable to use and very accurate in the search process.

Holster option (sold separately)

REF: ARZHOLEV05V2

The EVO5 capitalizes on ARVA's 35-year expertise to fit in the palm of your hand. Our R&D team pushed the size/performance ratio past the edge of the envelope to create a device that fits perfectly in your jacket pocket. With a 50m search strip width, group check, marking function, and an automatic revert-to-transmit mode, the EVO5 is jam packed with all of the essential functions needed to rescue an avalanche victim. Equipped with a backlit screen and a speaker that emits a precise, modulated beep, this transceiver will efficiently and effectively guide you to the burial zone.

L'EVO5 capitalise 35 ans de savoir-faire ARVA dans la paume de votre main. Le ratio compacité/performance a été poussé à son extrême par notre équipe R&D pour une intégration optimale dans la poche de votre veste. 50m de largeur de bande, mode GROUP CHECK, fonction marquage, retour automatique en émission, gestion des interférences, l'EVO5 est un concentré de toutes les fonctionnalités indispensables au secours de victimes en avalanche. Doté d'un écran rétro-éclairé et d'un haut-parleur générant un son précis et modulé, il vous guidera efficacement jusqu'à la zone d'ensevelissement.

Mit dem EVO5 halten Sie fünfunddreißig Jahre ARVA Know-How in der Hand. Beim Verhältnis kompaktes Design/Leistung ist unser F&E-Team bis an die Grenzen des Machbaren gegangen, damit das Gerät optimal in Ihre Jackentasche passt. Das EVO5 verfügt über alle zur Bergung von Lawinopfern erforderlichen Funktionen: 50 m Suchstreifenbreite, GROUP CHECK-Modus, Markierfunktion, automatische Rückkehr in den Sendemodus, Interferenz-Management. Ausgestattet mit einem Display mit Hintergrundbeleuchtung und einem Lautsprecher, der einen präzisen, modulierten Ton erzeugt, führt es Sie sicher zur Verschüttungsstelle.

FEATURES

50m search strip width

Group check mode tests transmit frequency and power.

Marking function to identify burial victims already located.

Multiple burial indicator displays a "+" when more than 3 victims.

3 antennas to improve chances of finding a signal and for greater precision during the fine search.

Digital signal processing guides rescuer more efficiently towards the burial zone.

Auto-test lets the device run a diagnostic to verify that all main functionalities are working properly.

Backlit screen provides great contrast in any conditions or lighting.

Automatic revert-to-transmit mode by a timer set up (8min).

Interference management lets the user adjust the search technique in an area with considerable signal interference.

U-Turn alarm lets the rescuer know they are heading in the wrong direction.

Compact minimalist device (111mm x 72mm x 20mm)

Weight: 165g (including batteries)

Revert-to-transmit:

During a search, in the event of a secondary avalanche, the revert-to-transmit function allows the device to automatically switch back to transmit mode. This switch is activated by a timer after a certain period of time of user inactivity. The default setting is 8 min.

Interference management

Interference management maximizes the device's performance in search mode in an environment "overrun" by electromagnetic interference. To accomplish this, the device automatically reduces the search strip width and ignores all other frequencies to focus solely on the beacon being tracked. This function can be deactivated by the user.

Search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This feature is often used to compare beacon performance.

Evo 4

Simple & reliable

REF: ARNIEVO4V2

Straps

Holster option
(sold separately)
REF: ARZHOLEVO4V2

Holster

Our best seller, the EVO4 sets the standard for ease of use and accessibility. Designed with an intuitive display that performs well in any conditions, this device will appeal to a wide range of skiers and snowboarders aspiring to improve their avalanche rescue skills. The EVO4 is the ultimate ally in a multiple-burial search, with a marking function and a 3-victim indication on the display. The GROUP CHECK function verifies the transmit frequency and can easily test an entire fleet of transceivers. The CLIP FOR SAFE system ensures that your device automatically starts transmitting as soon as you clip in the shoulder strap.

Best-seller de la gamme, l'EVO4 est un modèle d'accessibilité. Doté d'une interface à la fois intuitive et performante, cet appareil conviendra à un large éventail de skieurs et snowboarders souhaitant développer leurs aptitudes techniques au secours en avalanche. Cet appareil sera votre meilleur allié en situation multi-victimes grâce à la fonction marquage et l'affichage de 3 victimes. Le mode GROUP CHECK incluant un contrôle de la fréquence d'émission permet de contrôler facilement un parc d'appareils. Le système CLIP FOR SAFE garantit à l'utilisateur que son appareil est automatiquement en mode émission à la fermeture de la sangle d'épaule.

Das EVO4, Bestseller der Reihe, ist ein Beispiel an Bedienungsfreundlichkeit. Das mit einer intuitiven und zugleich leistungsstarken Benutzeroberfläche ausgerüstete Gerät ist bestens geeignet für Skitourengeher, Freerider und Snowboarder, die ihre technischen Fähigkeiten bei der Lawinenrettung verbessern möchten. Dank seiner Markierfunktion und der Anzeige von 3 Verschütteten ist es optimal geeignet für Situationen, in denen nach mehreren von einer Lawine verschütteten Personen gesucht wird. Der GROUP CHECK Modus inklusive Kontrolle der Sendefrequenz ermöglicht es, eine Gruppe von Geräten zu kontrollieren. Das CLIP FOR SAFE System garantiert dem Benutzer, dass sein Gerät beim Schließen des Schultergurts automatisch in den Sendemodus schaltet.

FEATURES

40m search strip width

Group check mode tests transmit frequency and power.

Marking function to identify burial victims already located.

Multiple burial indicator displays a "4" when more than 3 victims.

3 antennas to improve chances of finding a signal and for greater precision during the fine search.

Digital signal processing guides rescuer more efficiently towards the burial zone.

Auto-test lets the device run a diagnostic to verify that all main functions are working properly.

Backlit screen provides great contrast in any conditions or lighting.

The EVO4 is equipped with our CLIP FOR SAFE system that ensures that the device automatically switches on when the user clips in the shoulder strap.

Weight: 240g
(including batteries)

Group check

The group-check function allows you to easily verify if every member of your group has their beacon in transmit mode. The group-check function enables the device to conduct a fine search, allowing you to individually check the members of your group at a one-meter distance.

Marking function

Once one victim is found, the marking function allows you to ignore their signal to focus on searching for other victims. The "marked" victim's signal is no longer indicated during the rest of the search.

Clip for safe

As soon as you put on your transceiver and clip the strap, it automatically switches on and starts transmitting. This is an easy and convenient way to ensure that your device is in transmit mode, and increases everyone's safety when heading into the backcountry or off-piste.

Range overview

Weight	240g	165g	214g
Operating Life	250 h	220 h	350 h

Technology

🔦 Search strip width

The search strip width corresponds to the area "scanned" by the searching device. The larger the search strip width, the greater the area covered by the device. This feature is often used to compare beacon performance.

La largeur de bande de recherche correspond à la largeur de la zone "scannée" par l'appareil en recherche. Plus la largeur de bande de recherche est importante, plus l'appareil couvre une grande zone de recherche. Elle est souvent utilisée pour comparer les performances des appareils.

Die Suchstreifenbreite entspricht der Breite des vom Gerät im Suchmodus „gescannt“ Bereichs. Je größer die Suchstreifenbreite ist, desto größer ist der vom Gerät abgedeckte Suchbereich. Sie wird häufig für den Leistungsvergleich unterschiedlicher Geräte herangezogen.

🔦 Autotest

When turning on your device it conducts an auto-check. This verifies battery levels, that the device is functioning properly, and signals any problems.

Lors de la mise en route, l'appareil fait un auto-check. Il contrôle le niveau des piles, la bonne fonctionnalité de l'appareil et vous informe en cas de problème.

Beim Einschalten führt das Gerät einen Selbsttest durch. Es überprüft den Ladezustand der Batterien, die ordnungsgemäße Funktion des Geräts und informiert den Nutzer im Falle eines Problems.

🔦 Group check

The group-check function allows you to easily verify if each member of your group has their beacon in transmit mode. The group-check function enables the device to conduct a fine search, allowing you to individually check the members of your group at a one-meter distance.

La fonction group-check permet de s'assurer simplement que tous les membres d'un groupe portent un DVA en émission. La fonction group-check place l'appareil en recherche de proximité, permettant de contrôler chacun des membres du groupe individuellement en se plaçant à moins d'un mètre d'eux.

Mit der Gruppentest-Funktion lässt sich auf einfache Weise feststellen, ob alle Mitglieder der Gruppe ein im Sendemodus befindliches LVS-Gerät tragen. Für die Gruppentest-Funktion schaltet das Gerät auf Nahsuche, so dass der Gruppenleiter jedes einzelne Mitglied der Gruppe aus einer Distanz von unter einem Meter kontrollieren kann.

🔦 Frequency control

In group-check mode, the beacon equipped with a frequency check function will indicate if the other devices are transmitting properly at the international standard frequency of 457 kHz. All beacons on the market use this frequency, but it may deviate over time with use. If the frequency of the transmitting device deviates more than +/- 80 Hz, the beacon in group-check mode will indicate an error. If the frequency verification is measured, the deviation will be displayed on screen.

En mode group-check, l'appareil équipé de la fonction contrôle de fréquence indique si l'appareil en émission fonctionne bien sur la fréquence internationale de 457 kHz. Tous les appareils du marché utilisent cette fréquence mais peuvent cependant se décaler avec l'usure. Si la fréquence de l'appareil en émission est décalée de plus de + ou - 80 Hz alors l'appareil en mode group-check indique une erreur. Si le contrôle de fréquence se fait par mesure alors la déviation de fréquence est affichée.

Im Gruppentest-Modus zeigt das mit der Frequenzkontrolle ausgestattete Gerät an, ob das Gerät im Sendemodus die internationale 457 kHz Standardfrequenz verwendet. Alle im Handel erhältlichen Geräte verwenden diese Frequenz, können allerdings im Laufe der Zeit eine Abweichung aufweisen. Wenn die Frequenz des Geräts im Sendemodus um + oder - 80 Hz abweicht, zeigt das Gerät im Gruppentest-Modus einen Fehler an. Wenn die Frequenzkontrolle durch Messung erfolgt, wird die Frequenzabweichung angezeigt.

🔦 Revert-to-transmit

During a search, in the event of a secondary avalanche, the revert-to-transmit feature allows the device to automatically switch back to transmit mode. This switch is activated either by a timer after a certain period of time of user inactivity, or by a motion detector after a certain amount of time where the device has not moved. Configure these timeframes in your beacon's settings menu.

Lors de la recherche, en cas de suravalanche, la fonction retour en émission permet de repasser l'appareil en émission automatiquement, sans action de l'utilisateur. Le retour en émission se fait soit par timer, c'est-à-dire après un délai sans action de l'utilisateur soit par détecteur de mouvement, après un délai sans mouvement de l'appareil. Ces délais sont paramétrables dans le menu de configuration de l'appareil.

Bei einer Nachlawine ermöglicht es die Funktion „Rückstellung in den Sendemodus“, das Gerät ohne Eingreifen des Benutzers automatisch vom Such- in den Sendemodus zu schalten. Die Rückstellung in den Sendemodus erfolgt entweder per Zeitschaltuhr (nachdem das Gerät eine bestimmte Zeit vom Benutzer nicht betätigt wurde) oder über Bewegungsmelder (nachdem das Gerät eine bestimmte Zeit nicht bewegt wurde). Diese Zeiten können im Konfigurationsmenü des Geräts programmiert werden.

🔦 Interference Management

Interference management maximizes the device's performance in search mode in an environment "overrun" by electromagnetic interference. To accomplish this, the device in search mode automatically reduces the bandwidth and ignores all other frequencies to focus solely on the beacon being tracked. This feature can be deactivated by the user.

La gestion des interférences optimise les performances de l'appareil en recherche dans un environnement "pollué" par des interférences électromagnétiques. Pour se faire l'appareil en recherche réduit automatiquement la largeur de bande de recherche pour se concentrer sur le signal de l'appareil recherché en faisant abstraction des fréquences parasites. Cette fonction peut-être désactivée par l'utilisateur.

Das Interferenz-Management optimiert die Leistungseigenschaften des Geräts bei der Suche in einer durch elektromagnetische Störungen beeinträchtigten Umgebung. Hierfür reduziert das im Suchmodus befindliche Gerät automatisch die Suchstreifenbreite, um sich auf das Signal des gesuchten Geräts zu konzentrieren und Störfrequenzen auszublenden. Die Funktion kann vom Benutzer deaktiviert werden.

🔦 Marking function

Once a victim is found, the marking function allows you to ignore their signal to focus on searching for other victims. The "marked" victim's signal is no longer indicated during the rest of the search.

En recherche, une fois une victime localisée, la fonction marquage permet de faire abstraction de cette victime pour se concentrer sur la recherche d'une autre victime. Le signal de la victime "marquée" n'est alors plus pris en compte pour la suite de la recherche.

Wenn eine verschüttete Person lokalisiert wurde, ermöglicht es die Markierfunktion, diese Person auszublenden, um sich auf die Suche nach einem weiteren Verschütteten zu konzentrieren. Das Signal des „markierten“ Verschütteten wird bei der weiteren Suche nicht mehr berücksichtigt.

🔦 Standby mode

A device in standby mode is neither searching nor transmitting. This function allows the user to work the avalanche without their device interfering with the ongoing search. In the event of a secondary avalanche, the revert-to-transmit function automatically switches the device back to transmit mode.

L'appareil en mode standby n'est ni en recherche, ni en émission. Cette fonction est destinée à travailler sur l'avalanche sans perturber les recherches avec les ondes de l'appareil. En cas de suravalanche, la fonction retour en émission remet automatiquement l'appareil en mode émission.

Im Standby-Modus ist weder die Such- noch die Sendefunktion aktiviert. Dieser Modus dient dazu, an einer Lawine zu arbeiten, ohne die Suche durch die elektromagnetischen Wellen des Geräts zu stören. Im Falle einer Nachlawine schaltet die Funktion „Rückstellung in den Sendemodus“ das Gerät automatisch wieder auf Senden.

🔦 Scrolling function

The scrolling function allows you to more efficiently organize rescue operations by selecting a specific victim to track and dividing search responsibilities between rescuers. Although the victim's identity is not displayed, a list of victims is generated in order of proximity, allowing you to select a victim based on their distance from you.

La sélection de victimes permet d'organiser un secours en sélectionnant la victime recherchée pour repartir au mieux la recherche entre les secouristes. L'identité des victimes n'est pas affichée mais une liste de victime est créée dans l'ordre de proximité ce qui permet de sélectionner la victime en fonction de la distance.

Die Funktion „Auswahl der Verschütteten“ dient zur Organisation eines Rettungsvorgangs. Die gesuchte Person wird ausgewählt, um die Suche bestmöglich zwischen den Rettern aufzuteilen. Die Identität der verschütteten Personen wird nicht angezeigt. Es wird eine Liste der Verschütteten in der Reihenfolge der Signalstärke angezeigt.

Holsters

Evo4 holster

REF: ARZHOLEVO4V2

The EVO4 holster is designed for you to more efficiently and effectively use your avalanche transceiver. The EVO4 ON/OFF button keeper cord allows the user to easily clip their device to the holster. Sling the holster over your left or right shoulder depending on personal preference.

Le holster EVO4 a été conçu pour permettre une utilisation optimale de l'appareil. Le cordon de connexion du bouton ON/OFF EVO4 permettra à l'utilisateur de rattacher facilement son appareil au holster. Ce holster peut être porté avec la sangle d'épaule positionnée à droite ou à gauche selon le choix de l'utilisateur.

Das EVO4-Tragesystem wurde mit Blick auf eine optimale Nutzung des LVS-Geräts konzipiert. Mit der Verbindungsschnur der ON/OFF-Taste des EVO4 kann der Benutzer sein Gerät am Tragesystem befestigen.

Evo5 holster

REF: ARZHOLEVO5V2

The EVO5 holster has been designed to allow optimal use of the device. The EVO5 connection cord with a carabiner allows the user to easily attach the device to the holster. The waist strap can be disconnected from the holster and turned into a belt.

Le holster EVO5 a été conçu pour permettre une utilisation optimale de l'appareil. Le cordon de connexion EVO5 équipé d'un mousqueton permettra à l'utilisateur de connecter facilement son appareil au holster. La sangle ventrale peut être déconnectée du holster pour se transformer en ceinture.

Der EVO5-Holster wurde entwickelt, um eine optimale Nutzung des Geräts zu ermöglichen. Die mit einem Karabiner ausgestattete Verbindungsschnur ermöglicht es dem Benutzer, sein Gerät ganz einfach mit dem Holster zu verbinden. Der Hüftgurt kann vom Holster getrennt werden, um ihn in einen Gürtel zu verwandeln.

NEO BT Pro Holster

REF: ARZHOLNEOBTPROV1

The NEO BT PRO holster is designed for optimal use of the device. Its form-fitting design and easy-to-use connection cord make this holster the perfect partner for to the NEO BT PRO.

Le holster NEO BT PRO a été conçu pour permettre une utilisation optimale de l'appareil. Un profil étudié pour épouser la morphologie de l'utilisateur ainsi qu'un cordon de connexion facile à utiliser font de ce holster le compagnon indispensable du NEO BT PRO.

Der NEO BT PRO-Holster wurde entwickelt, um eine optimale Nutzung des Geräts zu ermöglichen. Eine auf die Morphologie des Benutzers abgestimmte Form, sowie eine einfach zu handhabende Verbindungsschnur, machen dieses Holster zum unverzichtbaren Begleiter des NEO BT PRO.

Safety Pack

REF: SASAFETYPACK

Zippered storage sack for your shovel and probe.

Sac de rangement zippé pour votre pack sécurité pelle/sonde.

Reißverschluss tasche zum Verstauen von Lawinenschaufel und Sonde.

FEATURES

Size: 50cm x 25cm x 5cm

A wide zippered opening.

Compatible with all ARVA shovels and probes.

A mesh window to check contents.

Elastic bands to keep your probe and shovel in place and organized.

Pack safety box EVO4

Evo4 + Access 240 probe + Access Shovel

REF: ARPACV5EVO4

This rescue set, intended for both novices and experts, includes an EVO4 transceiver, an ACCESS 240 probe, and an ACCESS shovel.

Pack secours destiné aux pratiquants néophytes à réguliers intégrant un EVO4, une sonde ACCESS 240 et une pelle ACCESS.

Rettungspaket für Anfänger und regelmäßige Anwender mit EVO4, ACCESS 240-Sonde und ACCESS-Schaufel.

Pack safety box EVO5

Evo5 + Spark 240 Probe + Access TS Shovel

REF: ARPACV3EVO5

Compact snow-safety set that includes an EVO5 transceiver, an ACCESS TS shovel, and a SPARK 240 probe.

Pack secours format compact intégrant un EVO5, une sonde SPARK 240 et une pelle ACCESS TS.

Kompaktes Lawinenset bestehend aus einem EVO5, einer SPARK 240-Sonde und einer ACCESS TS-Schaufel.

Pack safety box Skitrip

Evo5 + Skitrip 240 Probe + Skitrip Shovel

REF: ARPACV2SKITRIP

Snow-safety set for skiers and snowboarders who just love to travel, it includes an EVO5 transceiver, a SKI TRIP shovel, and a SKI TRIP probe.

Le pack des skieurs et snowboarders amateurs de voyage, intégrant un EVO5, une sonde SKITRIP et une pelle SKITRIP.

Lawinenset für reisefreudige Skitourengeher, Freerider und Snowboarder bestehend aus einem EVO5, einer SKITRIP-Sonde und einer SKITRIP-Schaufel.

Pack safety box Pro

Neo BT + Guide 260 Probe + Axe shovel

REF: ARPACV2PRO

Snow-safety set for mountain professionals, intended for patrollers, guides, and all those who love winter exploration.

Le pack secours du professionnel de la montagne, dédié aux pisteurs, guides et aficionados de l'exploration hivernale.

Lawinenset für den professionellen Einsatz bestimmt für Pistenwarte, Bergführer und passionierte Wintersportler.

Probes

The probe is an essential tool for precisely locating someone buried in an avalanche. Our extremely sturdy and reliable probes are lightweight, compact, and quick to deploy for maximum efficiency during the fine search.

FLASH LOCK SYSTEM
The FLASH LOCK locking system uses a quick and effective knot to lock your probe when deployed.

PIN LOCK SYSTEM
The PIN LOCK locking system makes it quick and easy to deploy your probe by simply pulling on the handle.

RACK LOCK SYSTEM
The RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle.

	FLASH LOCK	PIN LOCK	RACK LOCK
RIGIDITY	★★	★★★	★★★★
USER-FRIENDLY	★★	★★★	★★★★
LIGHTWEIGHT	★★★★	★★★	★★

The pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.

13mm diameter tubes

Grip for easy handling

Stainless steel probe tension cable

Probes

RACE240

120g - Ø 10mm
REF: SORAC240V2

Light as a feather and with no bulk, the RACE 240 probe is designed for ski-mountaineering competitions. It meets ISMF and PDG equipment standards and can be shortened to 2.10 meters by removing a segment.

Avec un poids plume et un encombrement minimal, la sonde RACE 240 est destinée à la compétition de ski alpinisme. Elle répond aux exigences de la norme ISMF et PDG peut se transformer en sonde de 2.10 m en retirant un brin.

Die Lawinensonde RACE 240, ein Federgewicht mit minimalem Packmaß, ist für Wettkämpfe im Skibergsteigen bestimmt. Sie erfüllt die Anforderungen der ISMF- und PDG Verordnung und kann durch Entfernen eines Segments in eine 2,10 m lange Sonde umgebaut werden.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- Compact 30cm long tube segments make this probe easy to stow in your pack.
- 10mm diameter tubes
- Ultra-lightweight carbon fiber tubing
- Ultra-lightweight Kevlar tension cord.
- FLASH LOCK locking system uses a quick and effective knot to lock your probe when deployed.
- Probe meets ISMF equipment standards.
- Precise markings on probe indicate snow depth

ACCESS 240

190g - Ø 11mm
REF: SOACC240V2

Equipped with the FLASH LOCK locking system, the ACCESS 240 probe is reliable, lightweight, and will work for most off-piste and backcountry enthusiasts. The cone inserts at the end of each tube segment and the pull handle make deploying this probe quick and easy in emergency situations.

Dotée du système de verrouillage FLASH LOCK, la sonde ACCESS 240 est fiable et légère, elle conviendra à un grand nombre de pratiquants. Les inserts coniques en extrémité de tubes et la poignée de verrouillage facilitent le montage de la sonde en situation d'urgence.

Die mit dem FLASH LOCK-Verriegelungssystem ausgerüstete zuverlässige, leichte Lawinensonde ACCESS 240 ist für die meisten Wintersportler geeignet. Die konischen Einsätze an den Schaftenden und der Verriegelungsgriff erleichtern die Montage der Sonde in Notfallsituationen.

FEATURES

- 2.40m probe when fully deployed, 6 segments 40cm long
- 11mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Ultra-lightweight Kevlar tension cord.
- FLASH LOCK locking system uses a quick and effective knot to lock your probe when deployed.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Precise markings on probe indicate snow depth

SPARK 240

250g - Ø 12mm
REF: SOSPA240V2

30 CM
← COMPACT →

Efficient and effective in any conditions, the SPARK probe combines simplicity with unparalleled versatility. Incredibly compact, this probe is the ideal companion for all your ski or snowboard adventures.

Efficace en toutes conditions, la sonde SPARK combine un design épuré à une polyvalence hors norme. Sa compacité optimale en fera un compagnon idéal pour toutes vos aventures à ski ou snowboard.

Die bei allen Bedingungen effiziente SPARK-Lawinensonde kombiniert schlichtes Design mit extremer Vielseitigkeit. Ihr optimales Packmaß macht sie zum idealen Begleiter bei allen Ski- und Snowboardtouren.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- 30cm segments make it easy to stow this probe in your backpack.
- 12mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- PIN LOCK locking system makes it quick and easy to deploy your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Precise markings on probe indicate snow depth

SKI TRIP

290g - Ø 12mm
REF: SOSKI240V2

30 CM
← COMPACT →

Equipped with our RACK LOCK cable tension system and compact tube segments, the SKI TRIP probe is a true ally in any rescue situation. Compact and lightweight, this probe will fit perfectly into any gear kit for skiers and snowboarders who love to travel and explore snow-covered terrain.

Dotée du système de mise en tension par câble RACK LOCK et de brins compacts, la sonde SKI-TRIP sera votre meilleur allié en situation de secours. Compact et légère, cette sonde s'intégrera à la perfection dans la panoplie des skieurs et snowboarders amateurs de voyages et explorations sur neige.

Die SKITRIP-Sonde mit RACK LOCK-System und kompakten Segmenten ist der ideale Begleiter für alle reisenden Skitourengänger und Freerider.

FEATURES

- 2.40m probe when fully deployed, 8 segments 30cm long
- 30cm segments make it easy to stow this probe in your backpack
- 12mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle
- The pull handle makes it easy to deploy and tension the probe and snaps conveniently onto the main tube
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth
- Pouch with printed step-by-step avalanche rescue instructions

GUIDE 260

360g - Ø 13mm
REF: SOGUI260V2

Designed for mountain professionals the GUIDE 260 combines sturdiness and precision thanks to the 13mm diameter tube and RACK LOCK locking system.

Destinée aux professionnels de la montagne, la sonde GUIDE 260 allie résistance et précision en recherche grâce au diamètre de 13mm et au verrouillage par système RACK LOCK.

Die für professionelle Bergretter und Bergführer bestimmte Lawinensonde GUIDE 260 mit einem Durchmesser von 13 mm und RACK LOCK Arretierung kombiniert robuste Beschaffenheit und Suchpräzision.

FEATURES

- 2.60m probe when fully deployed, 7 segments 37.5cm long
- 13mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth
- Complies with all requirements for UIAA equipment standard 157, "Avalanche Rescue Probes"

Rescue 300

400g - Ø 13mm
REF: SORES300V2

The RESCUE 300 probe is designed for professionals and backcountry enthusiasts in areas of the world where the snowpack is consistently deep. The 13mm diameter tube along with the combined cable and RACK LOCK locking system make this an extremely sturdy and precise probe.

La sonde RESCUE 300 s'adresse aux professionnels du secours et pratiquants dans des secteurs géographiques où le manteau neigeux est fréquemment épais. Son diamètre de 13mm et son système de verrouillage par câble et RACK LOCK en font une sonde robuste et précise.

Die Lawinensonde RESCUE 300 wendet sich an professionelle Rettungskräfte und Wintersportler in Gegenden, in denen häufig dicke Schneedecken anzutreffen sind. Die robuste, präzise Sonde verfügt über einen Durchmesser von 13 mm und ein Arretierungssystem aus Stahlkabel und RACK LOCK.

FEATURES

- 3.00m probe when fully deployed, 8 segments 37.5cm long
- 13mm diameter tubes
- Strong and durable 7075 aluminum tubing
- Stainless steel tension cord.
- RACK LOCK locking system allows you to quickly pull the tension cable tight when deploying your probe by simply pulling on the handle.
- Pull handle makes it easy to deploy the probe and snaps conveniently onto the tube once the victim is located and you start shoveling.
- Cone inserts make it easy to assemble the tube segments
- Grip for easy handling
- Precise markings on probe indicate snow depth
- Complies with all requirements for UIAA equipment standard 157, "Avalanche Rescue Probes"

Shovels

Digging out someone buried in an avalanche is often the longest phase of a rescue. This is why we design our shovels for maximum effectiveness and efficiency. Extremely lightweight, with a telescoping shaft, or designed for professional use, we have the right shovel for your needs.

RACE 300G

REF: PERACEV1

The RACE ski mountaineering shovel is the ultra-light model in the range. Designed for competition, this product complies with ISMF and PDG standards.

Pelle de ski alpinisme, la pelle RACE est le modèle ultraléger de la gamme taillé pour la compétition, ce produit est en conformité avec les normes ISMF et PDG.

Die leichteste Lawinenschaufel der Modellreihe ausgestattet mit einem Carbonschaft und für den Wettkampf konzipiert.

FEATURES

- Overall shovel length: 61cm
- Ultra-lightweight carbon-fiber shaft, 47cm long
- Strong and durable anodized aluminum blade
- Optimized blade size: 21cm length x 21cm width x 1.5mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together
- Ergonomic T-grip handle
- Meets ISMF and PDG standards

PLUME 350G

REF: PEPLUMEV9

Equipped with a carbon-fiber shaft and a 1.5mm thick aluminum blade, the PLUME shovel is designed for users looking to strike the right balance between weight and shoveling efficiency.

Avec un manche carbone et un godet aluminium de 1.5mm d'épaisseur, la pelle PLUME s'adresse aux utilisateurs recherchant un compromis optimal en légèreté et efficacité de pelletage.

Die PLUME-Lawinenschaufel mit einem Carbonschaft und einem 1,5 mm dicken Schaufelblatt aus Aluminium wendet sich an Anwender, die nach einem optimalen Kompromiss zwischen Gewichtseinsparung und Effizienz beim Schaufeln suchen.

FEATURES

- Overall shovel length: 64cm
- Ultra-lightweight carbon-fiber shaft, 47cm long
- Strong and durable anodized aluminum blade
- Optimized blade size: 24cm length x 24cm width x 1.5mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

PLUME TS 490g

REF: PEPLUMETSV2

The PLUME TS shovel, the telescopic version of the PLUME, is equipped with our new extremely lightweight and compact blade, which means speed and efficiency when shoveling, incredible durability, and no extra weight.

Dotée du nouveau godet ultraléger et compact, la pelle PLUME TS est la variante télescopique du modèle PLUME offrant une efficacité de pelletage accrue et une grande durabilité sans compromettre la légèreté.

Ausgestattet mit dem neuen ultraleichten, kompakten Schaufelblatt, bürgt die Lawinenschaufel PLUME TS, Variante mit ausfahrbarem Teleskopschaft des PLUME-Modells, für hohe Schaufelleistung, ohne das Gewicht zu erhöhen.

FEATURES

- Shovel with telescopic shaft: 62cm minimum length, 76cm maximum length
- Oval aluminum shaft, 45cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 25cm length x 21cm width x 1.5mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together
- Ergonomic, easy to hold, T-grip handle

ACCESS 510g

REF: PEACCESSV5

Now available with a 2mm thick reinforced blade, the ACCESS shovel provides an excellent balance between packability, weight, and shoveling efficiency. It will perform well for a wide range of skiers and snowboarders.

Désormais disponible avec un godet renforcé de 2mm d'épaisseur, la pelle ACCESS est un excellent compromis entre compacité, poids et efficacité, elle conviendra à un large public de skieurs et snowboarders.

Die jetzt mit einem verstärkten Schaufelblatt von 2 mm Dicke verfügbare ACCESS-Schaufel bietet einen hervorragenden Kompromiss zwischen kompakter Bauweise, Gewicht und Effizienz und ist für alle Skitourengänger, Freerider und Snowboarder geeignet.

FEATURES

- Overall shovel length: 64cm
- Oval aluminum shaft, 43cm long
- Strong and durable aluminum blade
- Optimized blade size: 24cm length x 24cm width x 2.0mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

ACCESS TS 620g

REF: PEACCESSTSV5

Regular backcountry and sidecountry riders will naturally gravitate towards the ACCESS TS shovel. Equipped with a telescopic shaft, this shovel proves extremely effective in any rescue situation without compromising on weight or packability. The 2mm thick reinforced blade and oval shaft make it a reliably rigid and durable rescue tool.

Les amateurs de sorties régulières hors des domaines skiables se tourneront naturellement vers le modèle ACCESS TS. Grâce à son manche télescopique, cette pelle se révèle d'une grande efficacité en situation de secours sans compromettre ni le poids, ni la compacité. Son godet d'épaisseur 2.0 mm et son manche ovoïde lui confèrent rigidité et durabilité.

Skifahrer, die regelmäßig im Backcountry unterwegs sind, wählen das Modell ACCESS TS. Die leichte, kompakte Lawinenschaufel mit Teleskopschaft erweist sich in Rettungssituationen als besonders effizient. Das 2,0 mm dicke Schaufelblatt und der Teleskop-schaft bürgen für Steifigkeit und Langlebigkeit.

FEATURES

- Shovel with telescopic shaft: 57cm minimum length, 72cm maximum length
- Oval aluminum shaft, 35cm long when collapsed
- Strong and durable aluminum blade
- Optimized blade size: 24cm length x 24cm width x 2.0mm thick
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic T-grip handle

SKI TRIP 620g

PESKITRIPV3

Capable in any conditions, the SKI TRIP shovel combines a simple design with incredible versatility. Its amazing packability makes the SKI TRIP shovel the ideal companion for all of your skiing or snowboarding adventures.

Efficace en toutes conditions, la pelle SKI TRIP combine un design épuré à une polyvalence hors norme. Sa compacité optimale en fera un compagnon idéal pour toutes vos aventures à ski ou snowboard.

Die bei allen Bedingungen effiziente SKI TRIP-Lawinenschaufel kombiniert schlichtes Design mit extremer Vielseitigkeit. Ihr optimales Packmaß macht sie zum idealen Begleiter bei allen Ski- und Snowboardtouren.

FEATURES

- Shovel with telescopic shaft: 62cm minimum length, 76cm maximum length
- Oval aluminum shaft, 45cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 28cm length x 23cm width x 2.0mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together
- Ergonomic T-grip handle
- Compliant with requirements of the UIAA equipment standard "156 - Avalanche Rescue Shovels"

AXE 750g

REF: PEAXEV6

Equipped with the new compact ARVA blade, designed and shaped to make it easy to step on and efficient to dig with in any type of snow, the AXE shovel will prove more than trustworthy in any rescue situation. It converts into a hoe for increased shoveling efficiency when you need to move snow fast.

Dotée du nouveau godet compact ARVA dont le profil a été conçu pour faciliter l'appui avec le pied et réaliser des coupes de neige précises et efficaces, la pelle AXE sera votre meilleur allié en situation de secours. Cette pelle est convertible en pioche pour une efficacité accrue en phase de pelletage.

Die AXE-Schaufel mit dem neuen kompakten ARVA-Schaufelblatt, das es ermöglicht, die Schaufel leicht in den Schnee zu treten und Schneeblöcke präzise und effizient zu stechen, ist Ihr bester Helfer in Notfallsituationen. Um die Effizienz beim Schaufeln zu erhöhen, kann die Schaufel in eine Hacke umgebaut werden.

FEATURES

- Shovel with telescopic shaft: 73cm minimum length, 89cm maximum length
- Oval aluminum shaft, 49cm long when collapsed
- Strong and durable anodized aluminum blade
- New compact blade: 31cm length x 23cm width x 2.0mm thick (size includes blade-to-shaft connection)
- The PIN LOCK locking mechanism makes it quick and easy to put the blade and shaft together.
- Ergonomic Z-grip handle
- Converts into a hoe
- Shovel handle easy to grip.
- Compliant with requirements of the UIAA equipment standard "156 - Avalanche Rescue Shovels"

Backpacks

Ride range

"Better with Altitude": these words best describe my life philosophy. Born in the Chamonix mountains, I grew up surrounded by snow-capped peaks, and these became my playground and my passion. Having such intensive skiing practice from a very young age has taken me to the highest level in my sport, with the highlight a first world title on the Freeride World Tour and multiple expeditions. The mountains are therefore my daily training ground, but also my driving force. They can, however, suddenly turn into dangerous terrain, even for the most experienced skiers. Every time I go freeriding at a high level on skis, I always take my ARVA equipment. As the first tester of ARVA's avalanche safety equipment, this collaboration on the development of the new RIDE range therefore seemed like a no-brainer. And now... it's your turn to play it safer!

RIDE: LEO'S SECRETS:

BACK OPENING: Allows you to easily access all your equipment on the chairlift, with your skis on your bag or on steep slopes.

EQUIPMENT LOOP ON THE SHOULDER STRAP: To temporarily and quickly store your gloves or a hat.

VERY COMPACT VOLUME NEAR THE BACK: for more precision when freeriding. Removable belt: For a more versatile and easier to use sack for city life

« Better with Altitude » : ce sont les paroles qui décrivent le mieux ma philosophie de vie. Né dans les montagnes chamoniardes, j'ai grandi entouré de sommets enneigés, devenus mon terrain de jeu et ma passion. Ma pratique intensive du ski depuis mon plus jeune âge m'a conduit au plus haut niveau sportif, avec notamment un titre de champion du monde et de multiples expéditions. La montagne est donc mon terrain d'entraînement quotidien, mais aussi mon moteur. Pourtant, elle peut s'avérer très vite dangereuse, même pour les plus expérimentés. La marque ARVA m'accompagne ainsi quotidiennement dans ma pratique du ski freeride à haut niveau. En tant que premier testeur de leurs équipements de sécurité avalanche, cette collaboration pour le développement de la nouvelle gamme RIDE sonnait donc comme une évidence. Maintenant... à vous de jouer avec plus de sécurité !

RIDE : LES SECRETS DE LEO :

OUVERTURE DOS : Pour accéder facilement à tout ton matos sur le télé-siège, avec les skis sur le sac ou en pente raide.

PORTE-MATÉRIEL À LA BRETELLE : Pour stocker temporairement tes gants ou un bonnet en un clin d'œil.

VOLUME TRÈS COMPACT PRÈS DU DOS : pour plus de précision en freeride. Ceinture amovible : Pour un sac plus polyvalent et ne pas être encombré lors des usages urbains.

"Better with Altitude": Das sind die Worte, die meine Lebensphilosophie am besten beschreiben. Geboren in den Bergen von Chamonix, wuchs ich umgeben von schneebedeckten Gipfeln auf, die zu meinem Spielplatz und meiner Leidenschaft wurden. Meine intensive Skipraxis seit meiner Jugend hat mich auf das höchste sportliche Niveau geführt, das insbesondere durch einen Weltmeistertitel und mehrere Expeditionen gekrönt wurde. Der Berg ist somit mein tägliches Trainingsgelände, aber auch meine Motivation. Allerdings können sich die Berge selbst für die Erfahrensten schnell als gefährlich herausstellen. Die Marke ARVA begleitet mich daher täglich in meiner Praxis des Freeridens auf hohem Niveau. Als langjähriger Tester ihrer Lawinensicherheitsausrüstung, war es naheliegend bei der Entwicklung der neuen RIDE-Serie zusammen zu arbeiten ... und jetzt sind Sie an der Reihe, auf Nummer sicher zu gehen!

RIDE: LEOS GEHEIMNISSE:

RÜCKENÖFFNUNG: Auf dem Sessellift, mit den Skiern am Rucksack oder auf steilen Hängen bleibt die gesamte Ausrüstung immer griffbereit.

GERÄTESCHLAUFE AM SCHULTERGURT: für die bequeme Zwischenlagerung von Mütze oder Handschuhen.

SEHR KOMPAKTES VOLUMEN IN RÜCKENNÄHE: für mehr Präzision beim Freeriden.

ABNEHMBARER GÜRTEL: Für eine vielseitigere Anwendung des Rucksacks und für ein besseres Tragegefühl bei der urbanen Nutzung.

H2O tube protection

The shoulder strap has a zipped sleeve to hide the tube from your water pouch for a more streamlined design that will also keep the tube out of your way. The sleeve also protects the tube from hot/cold temperatures.

ROLL TOP

Roll top opening on the top that allows you to retrieve your gear from the top of the backpack without having to open it all the way. The roll top also provides an expandable volume.

Back opening

With the opening in the back, you can see all the gear inside your backpack in one go when preparing for a trip. It also allows you access to your equipment while out on a ride.

Recycled fabrics

This product has been made from strong recycled polyester fabric, minimizing our impact on the environment. We use 300D polyester as well as 150D polyester lining, both made from recycled plastics.

Removable waist belt

We believe that an ergonomic waist belt is essential to provide optimum support during your freeride outings. Not only does it ensure comfort and stability, it takes a good deal of the weight of the backpack from your shoulders and back. If you don't need the full support of the waist belt, you can remove it in seconds to minimize weight and material.

TOUR20

RESCUER25 PRO

Volume: 25L

Weight: 1000g

Technical backpack designed for everyday backcountry use

Tough, elegant, and lightweight, the RESCUER 25 PRO is a technical backpack designed for everyday backcountry or sidecountry riders looking for a compact, technical pack that can take a beating day-in and day-out.

Résistant, élégant et léger, le RESCUER 25 PRO est le sac technique destiné aux utilisateurs réguliers souhaitant un sac technique et compact qui les suivra dans un usage intensif et exigeant.

Der strapazierfähige, elegante und leichte RESCUER 25 PRO ist für Benutzer bestimmt, die regelmäßig unterwegs sind und sich einen technischen, kompakten Rucksack für den intensiven, anspruchsvollen Gebrauch wünschen.

FEATURES

Compact, close-fitting, 25L capacity pack.

Multiple openings to access main compartment.

Lightweight ergonomic waist belt with two large smartphone-compatible pockets and two heavy-duty gear loops.

Quick access external pocket.

Carry options skis (A-frame or diagonal), a snowboard, snowshoes, a rope, or an ice axe.

Compatible with the ARVA helmet holder.

Snow safety equipment storage system.

Compatible with multiple hydration systems and features a tube protection sleeve.

Dedicated pocket for goggles or other small valuables.

Materials: 140Dx210D polyamide CORDURA® ripstop HR / 330D polyamide ripstop for excellent weather resistance.

Quick-access front panel pocket
This low-volume pocket on the outside of your pack's front panel allows you to stow thin gear that requires quick access, such as a shovel blade, a map, or a pair of skins.

Reinforced construction for heavy-duty use
CORDURA® is a synthetic fabric with 3 times the abrasion resistance of other typical polyamide fabrics. While durable and incredibly robust, it remains relatively thin and lightweight. 40Dx210D CORDURA® polyamide ripstop HR is a thin fabric with a highly-resistant coating that can withstand the toughest conditions.

RESCUER32 PRO

Volume: 32L

Weight: 1180g

Designed for mountain professionals

A versatile tool ready for any backcountry adventure, the RESCUER 32 PRO is a great partner whatever your sport. Reliable and robust, you will never leave home without it.

Aussi polyvalent que les missions auxquelles vous le destinez, le RESCUER 32 PRO sera votre partenaire idéal quelle que soit votre activité. Fiable et robuste, vous n'êtes pas prêt de vous en séparer.

Der RESCUER 32 PRO ist ebenso vielseitig wie die Einsätze, für den Sie ihn benötigen und somit der ideale Partner für unterwegs. Von diesem zuverlässigen, robusten Produkt werden Sie sich bald nicht mehr trennen können.

FEATURES

Lightweight ergonomic waist belt with two large smartphone-compatible pockets and two heavy-duty gear loops.

Dual access to main compartment.

Heavy-duty tool pouches.

Two quick-access external pockets.

Carry options for skis (A-frame or diagonal), a snowboard, snowshoes, a rope, or **two ice axes**.

Compatible with the ARVA helmet holder.

External sleeves for storing your snow-safety equipment.

Load lifting straps on shoulder straps.

Compatible with multiple hydration systems and features a tube protection sleeve.

Dedicated pocket for goggles or other small valuables.

Heavy-duty construction for intense everyday use.

Materials: 140Dx210D CORDURA® polyamide ripstop HR/330D polyamide ripstop for excellent weather resistance.

External sleeves for stowing
your snow-safety equipment
Designed so that your shovel shaft and probe are easily accessible on the outside of your pack, these external sleeves save time and make organizing your gear much more efficient.

Reinforced construction
for heavy-duty use
CORDURA is a synthetic fabric with 3 times the abrasion resistance of other typical polyamide fabrics. While durable and incredibly robust, it remains relatively thin and lightweight. 40Dx210D CORDURA polyamide ripstop HR is a thin fabric with a highly-resistant coating that can withstand the toughest conditions.

Reactor airbag

Designed and developed entirely by ARVA's engineering team, the ARVA REACTOR avalanche airbag backpack is the result of 2 full years of R&D and more than 35 years of experience at the highest level working with snow safety gear. At only 650g, it is the lightest, most compact, and highest performing dual Airbag System on the market. Made in France, the REACTOR avalanche Airbag System is designed specifically for ARVA backpacks. We oversee the entire process from design through production to provide you with the highest level of performance and safety.

New Airbag system

Lighter, more compact and even more powerful:

A 25% reduction in the total length of the system compared to the previous one, this reduced size allows for more space in your bag. The previous version of our system was the lightest on the market. The new one is even lighter so that you don't feel like you have an airbag on your back. 60% of the activations are done once in the avalanche, so the inflation is subject to the constraints of the avalanche. With the REACTOR 2.0, we have optimized inflation power to ensure that the airbag will continue to inflate even when under pressure.

Plus léger, plus compact et toujours plus puissant :

Une diminution de 25% de la longueur totale du système par rapport au précédent, cet encombrement réduit permet d'avoir plus d'espace dans son sac. La version précédente de notre système était la plus légère du marché. La nouvelle s'est encore allégée afin que vous n'ayez pas l'impression d'avoir un Airbag sur le dos. 60% des déclenchements sont réalisés une fois dans l'avalanche, le gonflage est donc soumis aux contraintes de l'avalanche. Le REACTOR 2.0 optimise la puissance de gonflage en assurant une puissance maintenue dans le temps pour optimiser le gonflage même sous contrainte.

Leichter, Kompakter und immer leistungsstärker:

Zwei Ballone sorgen für mehr Sicherheit. In einer Lawine können die Naturelemente einen Ballon beschädigen, zum Glück haben wir zwei davon. Die Positionierung unserer Ballone ist so durchdacht, dass sie eine größere Auflagefläche haben. Diese umfassen im aufgeblasenen Zustand den Körper und erhöhen so seine Oberfläche und die Stabilität im Vergleich zu Rucksäcken mit nur einem Ballon, der an der Oberseite des Rucksacks angebracht ist.

Improved inflation reserve:

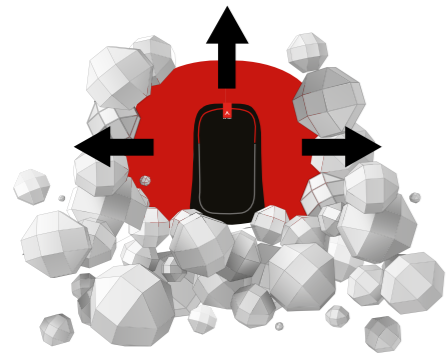

The inflation reserve is an important criterion for safety. It provides supplementary inflation time after the balloons have been filled completely. This is an additional safety feature in the event of deployment opposition. The REACTOR 2.0 inflates its balloons in 3 seconds and offers 15 additional seconds of inflation reserve, which is 50% more than our previous system.

Réserve de gonflage améliorée :

La réserve de gonflage est un critère de sécurité important. Elle représente le temps de gonflage supplémentaire après le remplissage complet des ballons. Une sécurité en plus en cas d'opposition au déploiement. Le REACTOR 2.0 gonfle ses ballons en 3 secondes et offre 15 secondes supplémentaires de réserve de gonflage soit 50% de plus que notre précédent système.

Verbesserte Aufblasreserve:

Die Aufblasreserve ist ein wichtiges Sicherheitskriterium. Sie stellt die zusätzliche Aufblaszeit dar, nachdem die Ballone vollständig gefüllt sind. Zusätzliche Sicherheit bei Entfaltungswiderstand. Der REACTOR 2.0 bläst seine Ballone in 3 Sekunden auf und bietet zusätzlich 15 Sekunden Aufblasreserve. 50 % mehr als unser vorheriges System.

Double balloons with optimal position:

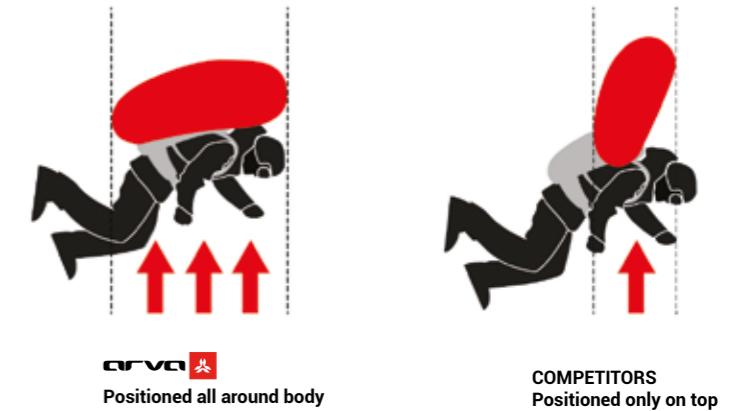

Having two balloons allows for increased safety. In an avalanche the natural elements can damage one balloon, fortunately we have two. The positioning of our balloons has been thought to have a more important bearing surface. They surround the body once inflated and increase the surface area of the body as well as the stability unlike bags with a balloon positioned on the top of the bag.

Double ballons avec une position adéquate :

Avoir deux ballons permet une sécurité accrue. Dans une avalanche les éléments naturels peuvent détériorer un ballon, heureusement nous en avons deux. Le positionnement de nos ballons a été pensé de façon à avoir une surface de portance plus importante. Ceux-ci entourent le corps une fois gonflés et augmentent la surface du corps ainsi que la stabilité contrairement aux sacs possédant un ballon positionné sur le haut du sac.

Doppelballone mit adäquater Position:

Eine um 25 % kürzere Gesamtlänge des Systems im Vergleich zum vorherigen System, wodurch Ihnen in Ihrem Rucksack mehr Platz zur Verfügung steht. Die Vorgängerversion unseres Systems war die leichteste auf dem Markt. Die neue Version ist noch leichter, sodass Sie kaum bemerken werden, einen Airbag auf dem Rücken zu haben. 60% aller Auslösungen erfolgen im Inneren einer Lawine. Das Aufblasen unterliegt somit den Zwängen der Lawine. Der REACTOR 2.0 optimiert die Aufblasleistung, indem er sicherstellt, dass die Leistung über die Zeit erhalten bleibt, um das Aufblasen auch unter Beanspruchung zu optimieren.

ONE SIZE FITS ALL :

The 3D fit technology allows an optimal adjustment of your REACTOR airbag in relation to your morphology in a single adjustment:

- Adjust shoulder strap length
- Adjust torso length
- Adjust trigger handle position
- Optimal adjustment means unparalleled comfort.

La technologie 3D fit permet en un réglage, un ajustement optimal de votre sac airbag REACTOR par rapport à votre morphologie :

- Longueur de bretelles
- Longueur de dos
- Hauteur de la poignée
- Un réglage optimal signifie un confort inégalable.

Die 3D-Fit-Technologie ermöglicht mit nur einer Einstellung eine optimale Anpassung Ihres REACTOR-Airbags an Ihre Morphologie:

- Länge der Schulterträger
- Länge der Rückenpartie
- Höhe des Griffs
- Optimale Passform bedeutet unübertroffenen Komfort.

REACTOR AIRBAG TOUR28UL

Volume: 28L

Weight: 1,250kg

The backpack that pushes the limits

The TOUR 28 Ultralight REACTOR is intended for backcountry skiers who want an ultralight airbag backpack, without having to compromise on functionality for full-day excursions.

Le sac qui bouscule les limites. Le TOUR 28 Ultralight REACTOR est destiné aux randonneurs à la recherche d'un sac airbag ultraléger, sans sacrifier l'aspect fonctionnel pour toutes vos sorties à la journée.

Der Rucksack, der Grenzen sprengt. Der TOUR 28 Ultralight REACTOR ist für Fahrer, die nach einem ultraleichten Airbag-Rucksack suchen, ohne auf Funktionen für ganztägige Ausflüge verzichten zu müssen.

FEATURES

Large volume of 28 liters.

Equipped with the ARVA REACTOR 2.0 airbag system.

LOW PROFILE airbag compartment.

Front access to main compartment.

Belt equipped with 2 very large quick-access **mesh pockets**.

Can carry 2 ice axes.

A-FRAME ski carry

Diagonal ski carry

Highly water-repellent and abrasion-resistant X-PAC front panel

Daisy Chain straps compatible with the ARVA **helmet holder**.

Elastic bands to hold safety equipment.

Easy-access pocket for small valuables.

Ultra-light shoulder straps equipped with an **expandable pocket** for a 500 ml flask or water bottle.

Ultra-light back with removable structure in ventilated foam.

Detachable safety whistle.

Right/left adjustable crotch strap.

YKK zip.

Materials : TUV GS certified 210D recycled CORDURA® and waxed X-PAC VX21 fabric
Complies with EN16716

CORDURA® recycled fabric + X-PAC fabric
Highly water-repellent and abrasion-resistant, our recycled CORDURA® 210D fabric offers high-level performance and increased strength for a longer life than conventional fabric. The X-PAC fabric on the front panel further increases the strength of this backpack, and is waterproof.

Quick-access elastic pockets
So you don't have to spend even a minute searching for gear, we have provided mesh pockets on the shoulder straps and waist belt. These are very elastic, so everything you need is quickly at hand: gloves, hat, skins, water bottle, glasses... There is also a mesh pocket on the shoulder strap where you can store a 500-ml flask or a small water bottle for immediate hydration.

REF: AIR1TOUR28ULV2
Without Airbag: AIRXTOUR28ULV2

Ultra-light construction
1,600 g, including the REACTOR 2.0 airbag system and carbon cartridge. To achieve such a featherweight, everything has been redesigned and reduced to a minimum, without compromising on safety and comfort.

Quick and easy A-frame ski carry
Attach your skis with just two clicks. Side carry (A-Frame) is particularly suitable for wide skis and provides better weight distribution on the backpack. The use of a strap to connect the tips of the skis so that the tails are spread apart is generally recommended.

Pro Range Flex Technology

FLEXIBLE. Whether choosing a bigger pack unit to carry all the essentials for your next big outing into the backcountry or simply renewing part of your system, it takes just a few seconds to switch from one FLEX COVER to another and no need to purchase a brand new backpack

FLEXIBLE. Que ce soit pour adapter votre sac aux exigences de votre sortie ou pour renouveler votre produit, vous pouvez en quelques secondes passer d'une FLEX COVER à une autre sans avoir à réinvestir dans un sac complet.

FLEXIBEL. Ob Sie Ihren Rucksack den Anforderungen Ihrer Tour anpassen oder Ihr Produkt erneuern möchten: Der FLEX COVER lässt sich in nur wenigen Sekunden gegen einen anderen austauschen, so dass sich die Neuanschaffung eines kompletten Rucksacks erübrigt.

DESIGNED FOR PROFESSIONALS

Our FLEX technology is designed to meet the stringent demands of our professional partners. We focused on providing a simple, robust, and easy-to-use solution.

CONÇU POUR LES PROS

La technologie FLEX a été développée pour répondre aux exigences de nos partenaires professionnels. Nous avons à cœur de proposer une solution simple et robuste qui soit le plus transparent possible à l'usage.

ENTWICKELT FÜR PROFIS

Wir haben die FLEX Technologie entwickelt, um den Anforderungen unserer professionellen Partner gerecht zu werden. Unser Anliegen war es, eine einfache, robuste Lösung und ein möglichst leicht verständliches Konzept anzubieten.

ROBUST. The frame in our FLEX FRAME base unit is designed to offer unparalleled carrying comfort during intense use. The shoulder straps, back panel, and waist belt are equipped with reinforced foam to last season after season spent out in the mountains. By using highly technical materials like P140x210D CORDURA® ripstop HR fabric, these heavy-duty backpacks perform day-in and day-out, year after year.

ROBUSTE. La structure de la FLEX FRAME offre un confort de portage destiné à un usage intense. Les bretelles, le dos et la ceinture sont équipés de mousses renforcées qui vous accompagneront saisons après saisons. Nous avons utilisé des composants de haute technicité comme le tissu P140x210D CORDURA® ripstop HR pour rendre les produits le plus durable et performants possible.

ROBUST. Der Aufbau des FLEX FRAME gewährleistet einen guten Tragekomfort für den intensiven Einsatz. Schulterträger, Rücken und Hüftgurt sind mit verstärktem Schaumstoff gepolstert, um Sie durch viele Winter zuverlässig zu begleiten. Die verwendeten technischen Materialien wie das Polyamid 140Dx210D CORDURA® A-Ripstop HR Gewebe sind die Gewähr für eine hohe Langlebigkeit und Leistungsfähigkeit der Produkte.

Canisters

Reactor steel canister

200 ML. / 490g / ARGON 300 BAR. 1LBS

The 200ml and 17cm long steel REACTOR EU canister takes up almost no space in your REACTOR avalanche airbag backpack. Built with high-strength steel and no welds, it complies with EN ISO 9808-1 standards, Directive 2010/35/EU & ADR/RID:2011, as well as IATA (table 2.3.A) regulations for baggage carried by passengers. Gas used: argon (UN1006), division 2.2. Pressure rating when filled: 300 bars (4351 PSI). Test pressure rating: 450 bars (6527 PSI). Burst pressure rating: >600 bars (8702 PSI).

Avec un volume de seulement 200ml et une hauteur de 17cm, la bouteille acier Reactor n'occupe presque pas d'espace dans votre sac Reactor. Construite dans un acier de très haute résistance et sans soudure, en conformité avec la norme EN ISO 9808-1, Directive 2010/35/EU & ADR/RID:2011 ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers. Gaz utilisé: argon (UN1006), division 2.2. Pression interne 300 bar. Pression d'épreuve : 450 bar. Pression de rupture > 600 bar.

Die 17 cm hohe Reactor-Stahlkartusche mit einem Volumen von nur 200 ml beansprucht nur wenig Platz in Ihrem Reactor-Rucksack. Sie ist aus höchstfestem Stahl und ohne Schweißnaht hergestellt und entspricht der Norm EN ISO 9808-1, der Richtlinie 2010/35/EU & ADR/RID:2011 sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden. Verwendetes Gas: Argon (UN1006), Division 2.2. Innendruck 300 bar. Prüfdruck: 450 bar. Berstdruck > 600 bar.

REF: AIR5BOUTA

Reactor carbon canister

250 ML. / 320g / NITROGEN 300 BAR. 0.68LBS

The steel liner and carbon-fiber coating create an extremely reliable and lightweight canister that weighs only 320g. The carbon REACTOR cylinder complies with ISO 11119-3 standards, Directive 2010/35/EU & ADR/RID:2011, as well as IATA (table 2.3.A) regulations for baggage carried by passengers.

Liner en acier inoxydable et enrobage en fibre de carbone pour une fiabilité optimale et un poids minimal, seulement 320g. La bouteille carbone Reactor est conforme aux à la norme ISO 11119-3, Directive 2010/35/EU & ADR/RID:2011 ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers.

Mit rostfreiem Stahl ausgekleidete und mit Carbonfaser umwickelte Kartusche für optimale Zuverlässigkeit bei minimalem Gewicht: nur 320 g. Die Reactor-Carbonkartusche entspricht der Norm ISO 11119-3, der Richtlinie 2010/35/EU & ADR/RID:2011 sowie den IATA-Vorschriften für den Luftverkehr (Tabelle 2.3.A) für gefährliche Güter, die durch Passagiere befördert werden.

Reactor steel canister refillable (empty)

250 ML / 550g / COMPRESSED AIR

High resistance steel bottle weighing 550g full. (470g empty). Can be filled with breathable compressed air (EN 12021 standard) using the Reactor refill system.

Bouteille en acier haute résistance pesant 550g pleine. (470g vide). Remplissable avec de l'air comprimé respirable (norme EN 12021) à l'aide du Reactor refill system.

Flasche aus hochfestem Stahl mit einem Gewicht von 550g voll. (470g leer). Befüllbar mit atemberbarer Druckluft (Norm EN 12021) unter Verwendung des Reactor refill system.

REF: AAIR9BOUTWDREFILL

Reactor steel canister USA refilable (empty)

275ML / 630g / 22,22 OZ / COMPRESSED AIR

Our higher-volume steel refillable 275ml canister maintains the same inflation speed at less pressure. This canister can be refilled with compressed air (EN12021 standards) by individuals trained in using the REACTOR REFILL SYSTEM. Designed for cascade refills without having to unplug the source of compressed air. Made with high-strength steel without welds, it complies with North American 3AA CYLINDERS.DOT/TC standards, as well as IATA (table 2.3.A) regulations for baggage carried by passengers. Test pressure rating: 7250 PSI.

La bouteille acier remplissable a une capacité de 275ml pour maintenir le niveau de performance de gonflage avec une pression plus faible. Elle est remplissable à l'air comprimé (norme EN12021) par des personnes formées à l'utilisation du Reactor refill system. Adaptée au remplissable en cascade sans déconnexion de la source d'air comprimé. Construite dans un acier de très haute résistance et sans soudure, en conformité avec les normes nord-américaines 3AA CYLINDERS.DOT/TC ainsi qu'à la réglementation IATA (tableau 2.3.A) pour le transport aérien des bagages par des passagers. Pression d'épreuve : 7250 PSI..

REF: AIR8BOUTUSRE

Reactor carbon canister USA refilable (empty)

250 ML / 370g / Standard: DOT/TC compliant - ISO11119-2 USA / M0812 IA18

Very light bottle in high resistance carbon weighing 300g empty, 370g full. Can be filled with breathable compressed air (EN 12021 standard) using the Reactor refill system.

Bouteille très légère en carbone haute résistance pesant 300g à vide, 370g pleine. Remplissable avec de l'air comprimé respirable (norme EN 12021) à l'aide du Reactor refill system.

Sehr leichte Kartusche aus hochfestem Karbon mit einem Leergewicht von 300 g, 370 g voll. Befüllbar mit atemberbarer Druckluft (Norm EN 12021) unter Verwendung des Reactor refill system.

REF: AIR8BOUTBUSREFILL

Refill base

The REACTOR REFILL SYSTEM is the first refill system that offers retailers and professional organizations an easy and reliable way to refill their own ARVA REACTOR sealed canisters. A sealed canister is extremely reliable when compared to a canister equipped with its own refill mechanism and additional connectors. Made with two compressed-air entry holes, this system allows the user to use a cascade refill system without having to disconnect the source of breathable compressed air (EN12021).

Le Reactor Refill System est le premier système de remplissage qui permet aux détaillants et organisations professionnelles de remplir leurs propres bouteilles ARVA REACTOR scellées de manière simple et fiable. La bouteille scellée garantit un très haut niveau de fiabilité comparé à une bouteille munie d'un mécanisme de remplissage et de raccords additionnels. Doté d'une double entrée d'air comprimé, il permet d'utiliser la technique de remplissage en cascade simplement et sans déconnecter la source d'air comprimé respirable (EN12021).

Radio holster

REF: SARADIOHOLV4

The ARVA radio holster works just as well for righties and lefties thanks to its rotating buckles. The holster features a heavy-duty dedicated smartphone pocket as well as a large flat zippered pocket for maps and documents. The holster adjustment system is designed for most professional and amateur radios.

Le porte radio ARVA s'adapte aussi bien aux gauchers qu'aux droitiers grâce à ses attaches sur pivot. Il dispose d'une poche renforcée spécifique pour le rangement d'un smartphone ainsi qu'une grande poche plate zippée qui accueillera des documents ou cartes. Avec son système de réglage, l'emplacement destiné au portage de la radio s'adaptera à une grande majorité des appareils professionnels ou de loisirs.

Das ARVA-Funkgeräteholster ist sowohl für Links- als auch für Rechtshänder geeignet. Es verfügt über ein verstärktes Smartphonefach und ein großes, flaches Reißverschlussfach für Dokumente oder Karten. Dank seines Einstellsystems lässt sich das Tragesystem den meisten Funkgeräten für den professionellen Einsatz oder Freizeitaktivitäten anpassen.

FEATURES

Compatible with all types of radios

Rescue

Rescue blanket 190g

REF: PRCOU190

Durable enough to be used several times, this 190g survival blanket reflects 90% of your body heat when the shiny side faces in. When facing out, the shiny side will reflect the sun's infrared rays to keep you cool. Whenever you bivvy, the 190g can serve as a ground cover for your tent with the shiny side up to reflect heat into the tent and keep moisture out.

Assez résistante pour être utilisée à multiples reprises, la couverture de survie 190g est capable de réfléchir 90% de la chaleur corporelle lorsque la partie brillante est placée à l'intérieur. Placée à l'extérieur, la partie brillante va réfléchir les rayons infrarouges du soleil pour vous garder au frais. Lors de bivouacs la couverture de survie 190G peut être placée sous votre tente avec la partie réfléchissante vers le haut pour vous isoler de l'humidité du sol et vous réfléchir de la chaleur.

Die für mehrmaligen Gebrauch geeignete haltbare Rettungsdecke von 190 g kann 90 % der Körperwärme reflektieren, wenn die glänzende Seite nach innen gewandt ist. Nach außen gewandt reflektiert die glänzende Seite die Infrarotstrahlen der Sonne, um Sie vor der Hitze zu schützen. Beim Bivakieren kann die 190 g Rettungsdecke mit der reflektierenden Seite nach oben unter das Zelt gelegt werden, um die Bodenfeuchtigkeit abzuhalten und die Wärme zu Ihnen zu reflektieren. Achtung: Nicht bei Gewitter oder in der Nähe von glühenden Gegenständen benutzen.

FEATURES

Size: 220cm x 140cm
Waterproof
Shiny-silver/Matte-silver facing
 Reflects 90% of your body heat
 Insulates from both cold and heat
 Reusable
 PE 70

Emergency Bivy

REF: PRBIEMERG2

If you're forced to spend an unexpected night outdoors, the EMERGENCY Bivy bivy sack will keep you warm and dry. This bivy sack reflects 90% of your body heat back to you, and protects you from wind, rain, and snow. Ultralight and compact, the EMERGENCY Bivy is a great addition to the emergency gear you carry on hikes, bike rides, when camping, as well as in your car. This bivy sack is your best friend on a cold night out in the mountains while enjoying the stars. Made with tear-resistant, aluminum-coated polyethylene, it can be repaired if needed.

Si vous êtes amené à passer une nuit dehors, comptez sur l'EMERGENCY Bivy pour vous garder au sec et au chaud. Réfléchissant 90% de votre chaleur corporelle, il vous protégera du vent, de la pluie et de la neige. Très léger et ultra compact, il complètera votre kit de secours pour la randonnée, le vélo, le camping ou votre voiture. Il sera également votre meilleur allié pour ne pas attraper froid en passant la nuit à observer les étoiles en pleine montagne. Fabriqué en polyéthylène enduit d'aluminium, il est résistant à la déchirure et est réparable en cas d'accroc.

Wenn Sie planen, eine Nacht im Freien zu verbringen, verlassen Sie sich auf den EMERGENCY Bivy, um Sie trocken und warm zu halten. Er reflektiert 90 % der Körperwärme und schützt Sie vor Wind, Regen und Schnee. Der besonders leichte, ultrakompakte Biwi ist eine optimale Ergänzung der Notfallausrüstung zum Wandern, Biken, Camping und fürs Auto. Außerdem verhindert er, dass Sie sich beim Beobachten der Sterne nachts in den Bergen erkälten. Er wird aus aluminiumbeschichtetem Polyethylen hergestellt, ist weiterreißfest und lässt sich im Falle eines Risses reparieren.

Rescue blanket 60g

REF: PRCOU60

This compact, ultra-lightweight, 60g survival blanket will follow you on any adventure. With the gold-colored side facing out, the survival blanket captures the sun's infrared rays to warm up the rescue victim while the silver-colored side reflects 90% of their body heat. In the event of extreme heat, you may want to prevent the body from heating up too much. In this case, place the gold-colored side against your body to let heat escape and the silver-colored side facing out to reflect the sun's infrared rays. Warning: do not use this survival blanket during a thunderstorm or near incandescent materials.

Très compact et ultralégère, la couverture de survie 60g vous suivra dans toutes vos aventures. En mettant la face dorée vers l'extérieur, la couverture de survie va capter les rayons infrarouges du soleil pour réchauffer la personne secourue pendant que la face argentée va réfléchir 90% de la chaleur corporelle. En cas de forte chaleur, vous pouvez être amené à vouloir limiter le réchauffement du corps. Dans ce cas, mettez la face dorée contre vous pour laisser sortir la chaleur émise par le corps et la face argentée réfléchir les rayons infrarouges du soleil. Attention : Ne pas utiliser en cas d'orage ou près de matières incandescentes.

Die sehr kompakte, ultraleichte Rettungsdecke mit einem Gewicht von 60 g begleitet Sie bei allen Abenteuern. Wenn Sie die goldene Seite nach außen drehen, nimmt die Rettungsdecke die Infrarotstrahlen der Sonne auf, um die verletzte Person zu wärmen, wohingegen die silberne Seite 90 % der Körperwärme reflektiert. Bei großer Hitze muss der Körper vor Erhitzung geschützt werden. Drehen Sie in diesem Fall die goldene Seite nach innen, so dass die vom Körper abgegebene Wärme nach außen geleitet wird und die Infrarotstrahlen der Sonne von der silbernen Seite reflektiert werden. Achtung: Nicht bei Gewitter oder in der Nähe von glühenden Gegenständen benutzen.

FEATURES

Size: 220cm x 140cm
Extremely compact
Waterproof
Gold/Silver facing
Reflects 90% of your body heat
Insulates from both cold and heat
Single use
PE 12

Rescue

INSULATED SEAT PAD

You can use the storage pouch to insulate you from the snow when you sit down for a break or a bite to eat.

COMFORTABLE

The Bivy Lite has optimal dimensions for comfortable use as a sleeping bag or as an overbag for your sleeping bag, but is still compact when folded away.

COMFORTABLE

The Bivy Lite has optimal dimensions for comfortable use as a sleeping bag or as an overbag for your sleeping bag, but is still compact when folded away.

A BIVY SACK THAT BREATHES

Keeps you dry from the inside out, and protects you against the elements so that you stay dry in all conditions.

REFLECTS 70% OF BODY HEAT

Keeping you warm and dry in every situation is a priority! Fully versatile as a sleeping bag liner, emergency bivy sack or an ultralight sleeping bag for the summer.

LIGHTWEIGHT & EFFICIENT

The Bivy Lite is lightweight and compact without compromising on performance. What could be better?

UPCYCLING

As part of our efforts to minimize our carbon footprint, we make the cover using the trimmings from our airbag balloons.
